

Apr 77

Do you buy the same business radio equipment from the same suppliers year after year?

Do you just assume there's nothing new on the market? Nothing better? Nothing cheaper?

Make those assumptions no more! Equip the people in your operation with the latest, most comprehensive source of buying information — the **1977 Business Radio Buyers' Guide**. Give them a reference manual designed to provide all the latest information for those who buy, sell and trade two-way radio and microwave equipment.

This year's **BRBG** promises to be the most complete and up-to-date guide yet. We have added a new section on microwave equipment, and there will be the regular sections detailing specifications and prices of mobile, base station and marine transceivers; monitors/receivers; antennas and towers; paging equipment; radio-telephones and test equipment.

In addition the **BRBG** provides you with a complete alphabetical listing of every major equipment manufacturer and supplier in the land/mobile industry.

This year make the best buys possible. Start with the **BRBG**. It's quite a bargain — especially if you order today while we are offering a 20% advance order savings. Complete the order blank below, and know you have compared all the possibilities when purchasing two-way equipment — with the **1977 BRBG**.

Please send me _____ copies of the **1977 Business Radio Buyers' Guide**.

☐ Enclosed is my check for \$6.95 for each **BRBG** ordered (a \$2.00 savings off the regular price of \$8.95.)

☐ Please bill me.
